Summary

Senior Engineer with 6+ years of experience building and shipping SaaS platforms, AI-integrated products, and mobile apps. Specialized in React.js, Next.js, and React Native, with solid backend capabilities in Node.js and Nest.js.

Most recently at UX Pilot AI, shipping frontend infrastructure for an AI-powered design tooling platform. Previously led teams, improved SEO and conversions for Staples, and delivered end-to-end products for US and UK clients across fintech, e-commerce and AI.

Professional Experience

UX Pilot AI — Senior JavaScript Developer (Full-Time, Remote)

July 2025 – June 2026

- Enhanced the Figma-to-HTML export reliability by 40% and sped up the exports by 2x through pipeline optimizations in the Figma Plugin.
- Drove 50% more React prototype usage by shipping the HTML-to-React pipeline and React Focus Mode (preview, chat, code editor) for in-product iteration.
- Improved designer workflow efficiency by 35% by building React Focus Mode – a unified editing workspace that replaced switching between preview, chat, and IDE tools.
- Reduced version drift across screens by 25% by syncing TLDraw canvas state with React Focus Mode edits via route containers, navigation sync, and version updates.

HetraByte — Lead Engineer (Part-Time, Remote)

Apr 2023 – July 2025

- Built and launched Pendfunds.com (FinTech platform), Vulkan Solutions (Software Services site) and Adacta.ai (Document Management Assistant) from scratch using React.js, Next.js, Strapi, and Nest.js.
- Contributed to Freebling.io (Marketing & Rewards platform), enhancing mobile responsiveness and frontend performance.
- Integrated AI features into Adacta.ai, contributing to a 15% increase in product growth.
- Led technical strategy, client communication, and delivery for US and UK-based clients, maintaining high client retention and satisfaction.
- Specialized in building scalable, SEO-optimized, and performance-driven applications.

MobileLive — Senior Software Engineer (Full-Time, Remote)

Feb 2024 – Dec 2024

- Led feature development and performance optimization for Staples' eCommerce platform using React.js, Context API, and Node.js.
- Improved SEO by 40% and boosted conversion rates by 30% through accessibility upgrades, sitemap automation, and UX improvements.
- Delivered major Apple landing pages 25% faster than planned, ensuring seamless CMS integration via Contentful.
- Automated dynamic page creation using Shopify Liquid, enhancing content scalability and operational efficiency.

GudangAda — Software Engineer (Full-Time, Remote)

Mar 2021 – Dec 2022

- Architected and maintained a large-scale SaaS application using Next.js, TypeScript, and a monorepo approach.
- Led modules for Authentication, Employee Access, and Reporting, driving a 40% increase in client adoption.
- Promoted to Team Lead; accelerated sprint delivery speed by 50% and improved stakeholder satisfaction.
- Established CI/CD pipelines for automated testing, reducing post-release bugs by 70% and enhancing team velocity.

Zepto Systems — React Native Developer (Full-Time, Onsite)

Aug 2020 – Mar 2021

- Revamped the Seerene NGO platform and developed RightCRM from scratch, expanding Zepto's software portfolio.
- Specialized in video processing solutions for mobile apps using react-native-ffmpeg.

YSTL — React Native Developer (Full-Time, Onsite)

Jan 2020 – Aug 2020
